

COVERT VEST

The covert vest (AVC) offers concealable protection suitable for wearing under a shirt or jacket. It provides protection to the front, back & sides of the body.

The outer cover is manufactured from a tough, lightweight outer fabric with a moisture-wicking mesh inner liner. The mesh fabric transports moisture away from the body which increases the comfort of the armour during long periods of use. The cover is adjustable at the shoulders and waist in order to accommodate small variations in user sizing. Alternative outer cover fabrics and colours are available.

Options

Choice of colour: beige, white, black or blue.
Pockets for upgrade insert plates.

Dimensions

The AVC in size Large has a protective area of 0.29m².
The weight of a complete vest will depend on the protection level selected.

Protection Levels

The AVC is available in a wide range of HOSDB & NIJ protection levels. Please refer to the Jack Ellis Armour Systems Datasheet for further information.
